

Web Design with Joomla

Course Length: 3 Saturdays

Overview

This course provides users with the ability to correctly install, configure and maintain a Joomla site while learning to leverage the power of extensions and templates. Regardless of the size or type of Joomla site you want to build or currently own, you'll benefit from the combined years of experience that will empower you to grow your site or build it correctly from the beginning. This course covers installation, configuration, security, maintenance, content, extensions, templates and community resources instructed by a well-known Joomla expert and project member. We give you the tools to continue learning and growing after the course is over while setting you up for success with your website.
